

Energy Storage Workshop Straw Proposal

Michael Colvin
R10-12-007

California Public Utilities Commission

June 28, 2010

Potential Barriers CPUC could address here

- Contract evaluation
 - PPA evaluation for stand alone (ownership models)
 - Integration with RPS contracts
- Stand-by rates
- Rate Design
- Avoided economic curtailment (intermittent renewables)
 - potential value stream
 - Avoided over-generation
- Loading Order connections (EE, DG, RPS, DR, etc.)
- Resource Adequacy and Capacity values
 - Any double counting (?)

Potential Barriers CPUC could address at other forums

FERC: Notice Of Inquiry
Frequency Regulation

CAISO:

- Transmission Analysis
 - How does CAISO consider storage in its transmission planning?
 - PIRP modifications

Thank you!
